'Let The Kennedys Bail Us Out'

TO THE EDITOR OF THE ENQUIRER.

The Cuban tractor deal is backed by Kennedy. That's bad, but now the President urges the American people to make contributions to the ransom fund to pay off the Communists for a failure. The Central Intelligence Agency dropped \$45 million down this drain. It failed because of the lack of ability, proper leadership and common horse sense of both our last President and our present one.

I suggest that we do away with Memorial Day. It was set aside for us to commemorate heroes — and all the honored dead. If we pay a ransom to the Communist government of Fidel Castro and the Communist bloc, we will not have kept faith with those who died that this nation should live free. We have faith in them if we subscribe to an appeasement and bribery.

If the remarkable Kennedys want this ransom paid, let them pay it. They have the money. They bought JFK. Let them bail him out.
